

New Year Design Resolutions

Some of our favorite design experts share their design goals that you can emulate to make this year your home's best yet.

Written by Kelsey Kittle

Simplify, Simplify

"I would love to turn my 8-year-old daughter into more of a minimalist. Ha. My home is craft central, and between all the drawings, pottery and LEGO building in various stages of progression, things can get a bit overwhelming. I am generally good at parting with items I do not use or love and, as I get older, avoiding them altogether. I am hoping to instill some of that in her, too. It is fun to have stuff to play with, but you also need room to think and be."
